# APRC8 Function v1.0.0.8

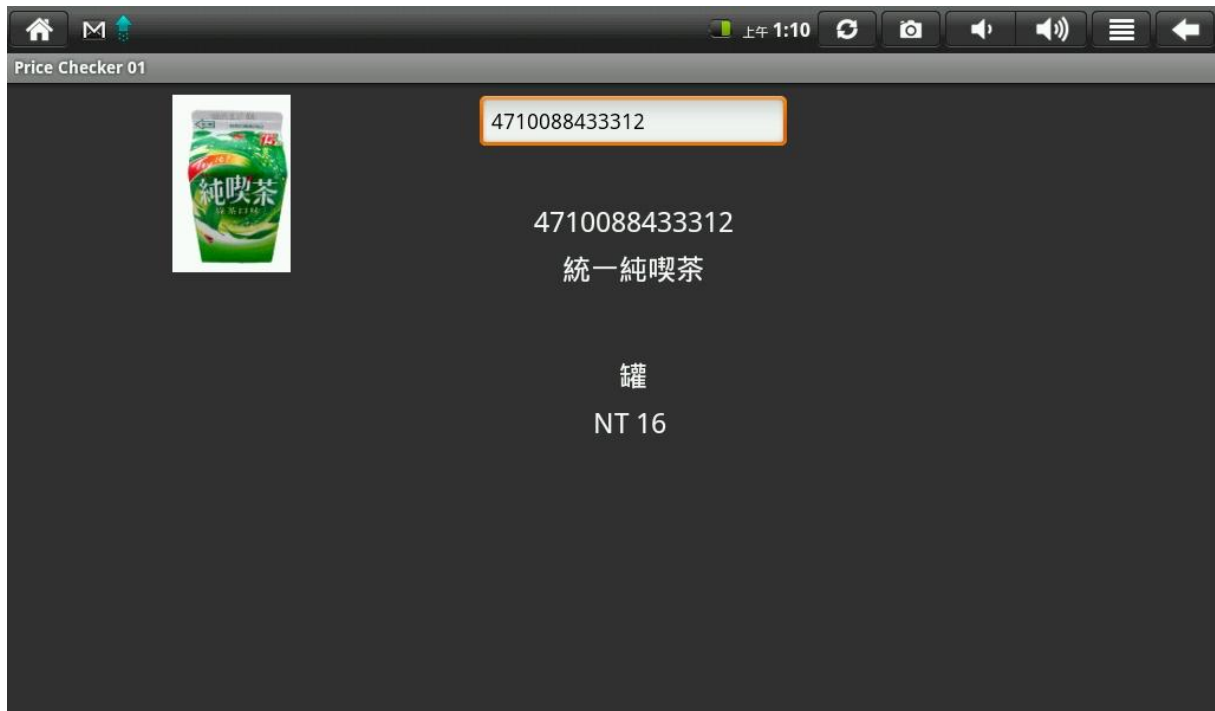

---

Pop up the Menu by tapping 

# APRC8 Function v1.0.0.8

Scan barcodes on products (4710088433312) then look up prices and reviews.

## Setup

1. This setting allows you to set the id of the device, the company and password of import and determine the SD card path.
2. Check the Setup Properties by tapping  → **Setup**
3. Key in the name of the m id, company, password and the path of the SD card. Tap “Apply”. The system will save the information.
4. m.id : Your machine no.
5. company : Your company or you can blank.
6. password : The default password (999) it was provided with from the factory.
7. sd card path : Our Aprc8 application should read 123.txt which is stored in a SD card. You have to set a path for the SD Card in the tablet pc so that we can read the file.

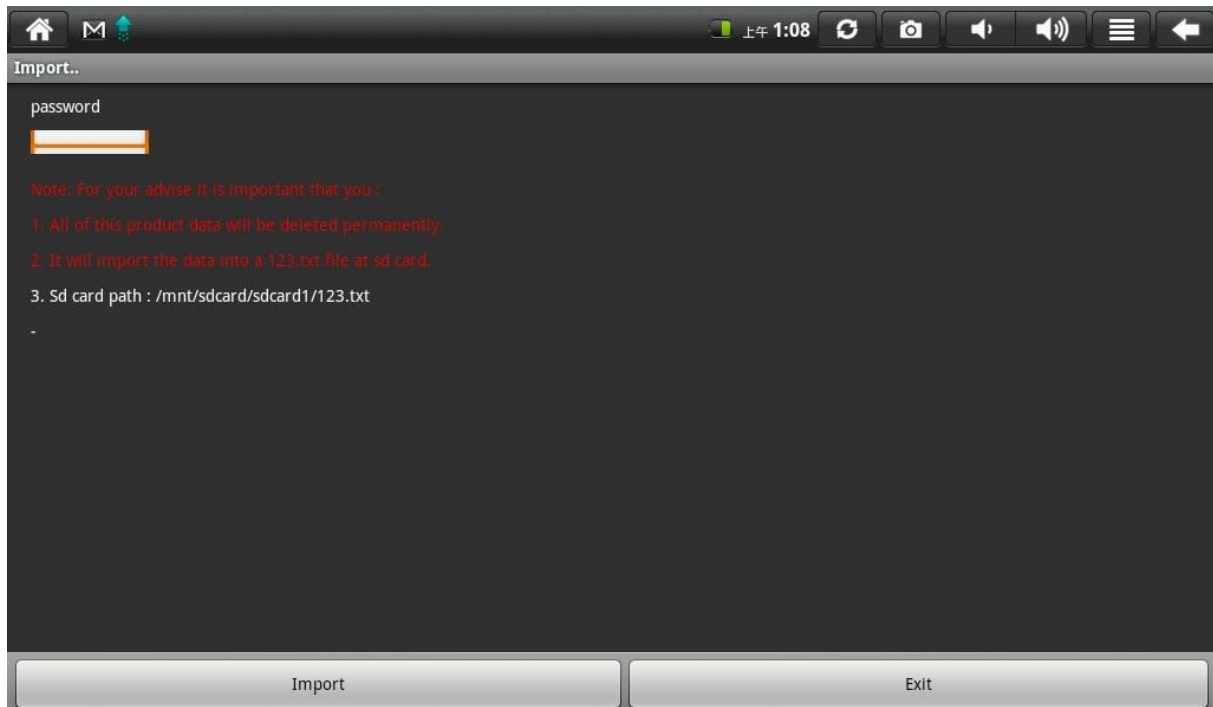

The screenshot displays the 'Setup..' screen of the Aprc8 application. The interface includes a top status bar with icons for home, mail, and signal strength, along with the time '上午 1:07' and system icons for refresh, camera, volume, and navigation. The main area contains the following fields:

- m.id: 01
- company: kutech corporation
- passwaord: 999
- sd card path (total:2,414MB available:2,412MB): /mnt/sdcard/sdcard1/
- Below the path field, the text /mnt/sdcard is visible.

At the bottom of the screen, there are two buttons: 'Apply' and 'Exit'.

## Import

1. If you need to download the file for the SD card. Here are the steps how you do this in Aprc8
2. Check the Import Properties by tapping  → **Import**
3. Key in your password. It needs a password to run import function. This password is to protect the terminal from other users to access the import function by setting a unique password.
4. Press “Import”.
