iBMI360 Function v1.0.0.8

iBMI360 is a set of healthy self management apps for body mass index. This body mass index calculator is based on the standard BMI measurement that takes your weight and height and basically tells you if you have an unhealthy body weight. The body mass index (BMI) calculator bellow will figure out your body mass index category (underweight, normal weight, overweight, or obesity).

KUO YUE always persists in giving consideration to both technology innovation and quality. The software can have inexhaustible innovation and creation; therefore, it's enchanting. The recent technology develops in order to meet the user's needs. The renovation of the consumer software is one good example.

iTunes Link :
