iDashboard Function v1.6.1

The Mac App for playing the video of the iDashboard driving recorder is capable of synchronized display of the driving video and the street map by combining the static and the dynamic states via the video and the street map. It allows one to have a broader and clearer perspective while enhancing your visual sense of space.

The software can have inexhaustible innovation and creation; therefore, it's enchanting. The recent technology develops in order to meet the user's needs. The renovation of the consumer software is one good example.

KUTECH always persists in giving consideration to both technology innovation and quality.
