iGoAny360 Function v1.0.0.8

This app offers travel distance calculation and positioning service, ideal for people engaging in sports, traveling, and field work. It records the distance travelled and allows the user to send the data back in the .xml format. In field work, the data provides companies and organization managers a good reference for effective field work management. It comes with several useful functions, including a moving distance calculation, speed, time lapse, direction, coordinate, altitude, precision GPS positioning mode configuration, maps, monthly mileage statistics. KUO YUE always persists in giving consideration to both technology innovation and quality.

The software can have inexhaustible innovation and creation; therefore, it's enchanting. The recent technology develops in order to meet the user's needs. The renovation of the consumer software is one good example.
