## iNventory361 Function v3.5.6.5

---

The software can have inexhaustible innovation and creation; therefore, it's enchanting. The recent technology develops in order to meet the user's needs. The renovation of the consumer software is one good example.

The software iNventory361 broke new ground in the realm of inventory control system. KUO YUE would like to introduce the stock count solutions in iPad. The solution integrates iPad and Bluetooth barcode scanner. To record an inventory transaction, the system uses a bluetooth barcode scanner to collect stock items from the operators via iPad/iPad2. KUO YUE always persists in giving consideration to both technology innovation and quality.

iTunes Link :

- v3.5.6.8

Features :

- Fast & easy to setup iNventory361 software
- Scan directly to barcode for stock item
- Shorten stock taking process
- To record your product nr, location nr, qty information.
- Data transmission with e-mail
- **Export a text file** of your stock count data if you need a delimited text file to load into another program.
- **Export your stock count data directly to Excel (CSV)** if you're not sure what info you need and you'd rather delete and rearrange columns in a spreadsheet program.
- Inventory data maintenance: addition and deletion of inventory data are available.
- iPad2 connect to barcode scanner with bluetooth interface.
